

Describing datasets

IC152 Lec 12
Feb 2021

The nature of data

- Numerical findings: need to be presented consisely
- Especially needed for large datasets
- Features of the data include:
 - Range
 - Degree of symmetry
 - Concentrated or spread out
 - Where are they concentrated? Etc.
- Univariate or multivariate

An example

2, 2, 0, 0, 5, 8, 3, 4, 1, 0, 0, 7, 1, 7, 1, 5, 4, 0, 4, 0, 1, 8, 9, 7, 0,
1, 7, 2, 5, 5, 4, 3, 3, 0, 0, 2, 5, 1, 3, 0, 1, 0, 2, 4, 5, 0, 5, 7, 5, 1

Data: Number of sick leaves taken by 50
employees, over six weeks

Small dataset

Frequency table

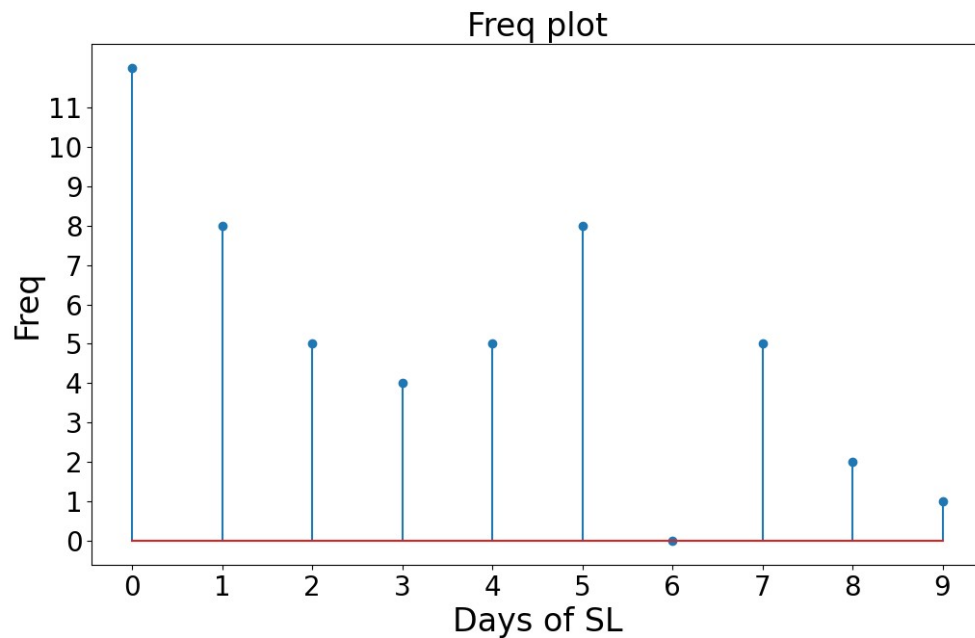

- How many workers had at least one day of sick leave? $50 - 12 = 38$
- How many workers had between 3 and 5 days of sick leave? $4 + 5 + 8 = 17$
- How many had more than 5 days? 8

| Value | Freq |
|-------|------|
| 0 | 12 |
| 1 | 8 |
| 2 | 5 |
| 3 | 4 |
| 4 | 5 |
| 5 | 8 |
| 6 | 0 |
| 7 | 5 |
| 8 | 2 |
| 9 | 1 |

Sum of freq
values = N

N is the
total
number of
samples in
the data

| Value | Freq |
|-------|------|
| 0 | 12 |
| 1 | 8 |
| 2 | 5 |
| 3 | 4 |
| 4 | 5 |
| 5 | 8 |
| 6 | 0 |
| 7 | 5 |
| 8 | 2 |
| 9 | 1 |

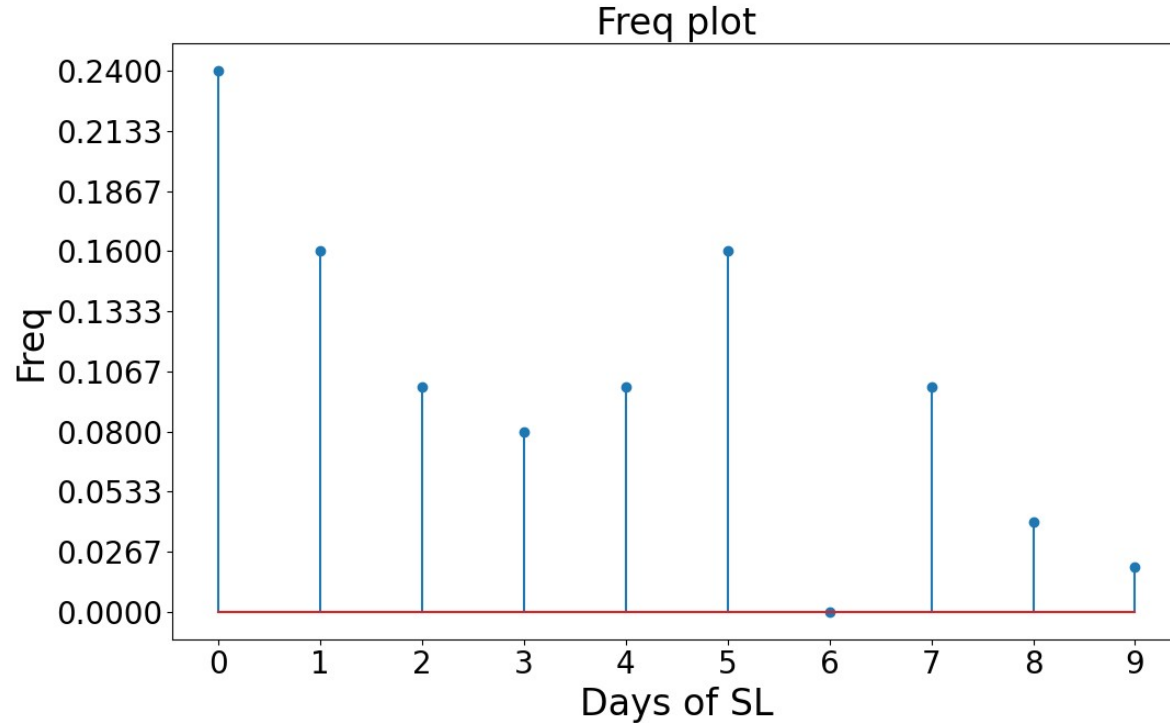

How will you construct this table
and make the plot?

```
[0, 0, 0, 0, 0, 0, 0, 0, 0, 0, 0, 0, 0, 1, 1, 1, 1, 1, 1, 1, 1, 1, 2, 2, 2, 2,
2, 3, 3, 3, 3, 4, 4, 4, 4, 4, 5, 5, 5, 5, 5, 5, 5, 5, 7, 7, 7, 7, 7, 8, 8,
9]
```

Sorting is a common preprocessing operation

Normalized frequency plot

Sometimes
normalized
frequency is more
convenient

Sum of frequency
values = 1

Bar plot

Bars rather than lines

Types of bar plots

Pie chart: for non-numerical data
Visualization of relative frequency plot

Weapons used in crimes

Grouped data and histograms

| | | | | | | | |
|-----|-----|-----|-----|-----|-----|-----|-----|
| 213 | 174 | 193 | 196 | 220 | 183 | 194 | 200 |
| 192 | 200 | 200 | 199 | 178 | 183 | 188 | 193 |
| 187 | 181 | 193 | 205 | 196 | 211 | 202 | 213 |
| 216 | 206 | 195 | 191 | 171 | 194 | 184 | 191 |
| 221 | 212 | 221 | 204 | 204 | 191 | 183 | 227 |

Data: Blood cholestrol levels

Used when the number of unique values are numerous

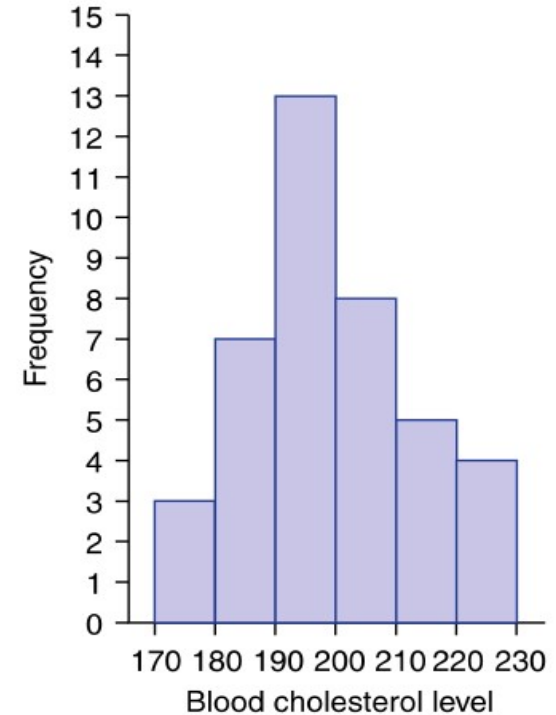

Sorted data

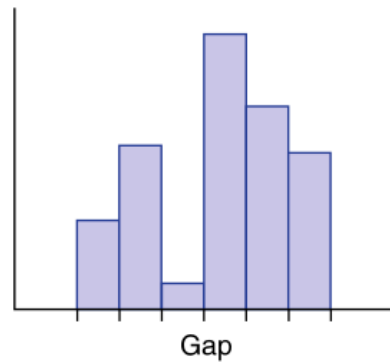

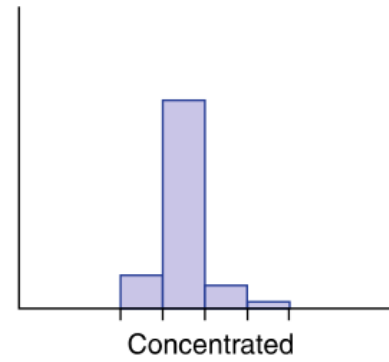

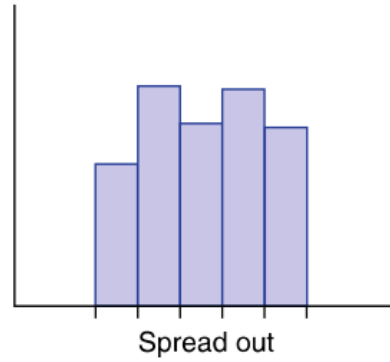

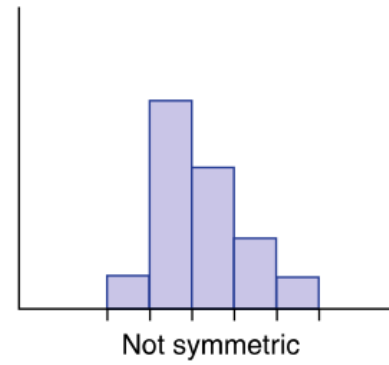

171, 174, 178, 181, 183, 183, 183, 184, 187, 188, 191, 191, 191, 192, 193, 193, 193, 194, 194, 195, 196, 196, 199, 200, 200, 200, 202, 204, 204, 205, 206, 211, 212, 213, 213, 216, 220, 221, 221, 227

Class interval contains left-end,
but not right-end

| Class intervals | Frequency | Relative frequency |
|-----------------|-----------|-------------------------|
| 170–180 | 3 | $\frac{3}{40} = 0.075$ |
| 180–190 | 7 | $\frac{7}{40} = 0.175$ |
| 190–200 | 13 | $\frac{13}{40} = 0.325$ |
| 200–210 | 8 | $\frac{8}{40} = 0.20$ |
| 210–220 | 5 | $\frac{5}{40} = 0.125$ |
| 220–230 | 4 | $\frac{4}{40} = 0.10$ |

Types of histograms

| Blood pressure | Number of workers | |
|----------------|-------------------|------------|
| | Aged 30–40 | Aged 50–60 |
| Less than 90 | 3 | 1 |
| 90–100 | 17 | 2 |
| 100–110 | 118 | 23 |
| 110–120 | 460 | 57 |
| 120–130 | 768 | 122 |
| 130–140 | 675 | 149 |
| 140–150 | 312 | 167 |
| 150–160 | 120 | 73 |
| 160–170 | 45 | 62 |
| 170–180 | 18 | 35 |
| 180–190 | 3 | 20 |
| 190–200 | 1 | 9 |
| 200–210 | | 3 |
| 210–220 | | 5 |
| 220–230 | | 2 |
| 230–240 | | 1 |
| Total | 2540 | 731 |

Number of
samples are
unequal

| Blood pressure | Percentage of workers | |
|----------------|-----------------------|---------------|
| | Aged 30–40 | Aged 50–60 |
| Less than 90 | 0.12 | 0.14 |
| 90–100 | 0.67 | 0.27 |
| 100–110 | 4.65 | 3.15 |
| 110–120 | 18.11 | 7.80 |
| 120–130 | 30.24 | 16.69 |
| 130–140 | 26.57 | 20.38 |
| 140–150 | 12.28 | 22.84 |
| 150–160 | 4.72 | 9.99 |
| 160–170 | 1.77 | 8.48 |
| 170–180 | 0.71 | 4.79 |
| 180–190 | 0.12 | 2.74 |
| 190–200 | 0.04 | 1.23 |
| 200–210 | | 0.41 |
| 210–220 | | 0.68 |
| 220–230 | | 0.27 |
| 230–240 | | 0.14 |
| Total | 100.00 | 100.00 |

Data: blood pressue values for two groups
of workers

Relative frequency
polygons

BP of older workers
seem to be more spread
out

| Worker i | IQ score x_i | Annual salary y_i (in units of \$1000) | Worker i | IQ score x_i | Annual salary y_i (in units of \$1000) |
|------------|----------------|---|------------|----------------|---|
| 1 | 110 | 68 | 16 | 84 | 19 |
| 2 | 107 | 30 | 17 | 83 | 16 |
| 3 | 83 | 13 | 18 | 112 | 52 |
| 4 | 87 | 24 | 19 | 80 | 11 |
| 5 | 117 | 40 | 20 | 91 | 13 |
| 6 | 104 | 22 | 21 | 113 | 29 |
| 7 | 110 | 25 | 22 | 124 | 71 |
| 8 | 118 | 62 | 23 | 79 | 19 |
| 9 | 116 | 45 | 24 | 116 | 43 |
| 10 | 94 | 70 | 25 | 113 | 44 |
| 11 | 93 | 15 | 26 | 94 | 17 |
| 12 | 101 | 22 | 27 | 95 | 15 |
| 13 | 93 | 18 | 28 | 104 | 30 |
| 14 | 76 | 20 | 29 | 115 | 63 |
| 15 | 91 | 14 | 30 | 90 | 16 |

Is there a relationship
between salary and
IQ?

Data: salary vs IQ for employees

Scatter plot: IQ versus salary

Higher IQ seems to indicate higher salary, in general

Can even predict values

Can also see if there are outliers

Data error?

Can only be used for 2D data
